

Procurement: Prequalification for Procurement of Rapid Diagnostic Kit

Ref No: #001/25/HEP/Proc-I

Management Responses on Queries raised on Pre-qualification documents for Procurement of Rapid Diagnostic Kit.

Response #	Queries /Clarifications	Management Response
1	Letter Ref: LDS/2025/K6, dated 16 th January 2025, Reservation against discriminatory requirement of WHO Prequalified of Rapid Diagnostic Testing kits, from Lab Diagnostic Systems (SMC) PVT.Ltd.	<p>WHO prequalified Rapid Diagnostic Testing Kit is a requirement of PC-1 of the Project "Prime Minister Program Elimination of HEP-C Infection" duly approved by the Executive committee of National Economic Council (ECNEC).</p> <p>WHO prequalification ensures that the RDT kits meet international standards for quality, accuracy, and safety. These standards are essential in achieving reliable diagnostic outcomes.</p> <p>The program's aim is to eliminate Hepatitis C infection, which requires the use of globally recognized, high-quality diagnostic tools to ensure accurate detection and reduce false negatives or positives.</p>

Procurement: Prequalification for Procurement of PCR Kit & Service

Ref No: #002/25/HEP/Proc-II

Management Responses on Queries raised on Pre-qualification documents for Procurement of PCR Kit & Service.

Response #	Queries /Clarifications	Management Response
1	The tender is for ICT or for Pakistan or for any specific territory?	It is for all over Pakistan
2	Details about the additional services? No. of healthcare facilities - from (pick-up points) and to (delivery points), for sample movement?	Across Pakistan, there are 6,990 healthcare facilities from where blood will be collected and transported to the Central Lab.
3	What is included in the SGPT, SGOT and Cell Pack testing costs? Define the scope	We Requires the Patient Value of SGOT along with the Upper Value of the SGOT kit. SGPT is not required. This refers to CBC (Complete Blood Count), not Cell Pack. The requirement includes HB and Platelets only.
4	Details about "stationery and lab items"? List of items?	Stationery includes printed reports of CBC, AST, and PCR; barcoder and its paper; and referral letters for patients with advanced diseases. Lab items include CBC tubes, PCR tubes (AST will be done from the PCR sample, so no additional tube is needed), pipettes, and tips for plasma separation.
5	Clarity on QR Code Verification?	Barcoding will be used on the samples for unique identification and traceability. This includes a barcode system that ensures proper sample labeling, tracking, and verification
